

Romel Javier Gomez Herrera - Full Stack Developer

bmxandcode@gmail.com ❖ [\(+51\) 980653479](tel:+51980653479) ❖ Peru, Lima

TL;DR

Romel is a highly skilled Full Stack Developer with over 5 years of experience, specializing in React, Node.js, and PostgreSQL, with a track record of building high-value software solutions. Equipped with a degree in Informatics and strong proficiency in ES6, HTML5, CSS3, and SASS. Experienced in ensuring high code quality through automated tests, and familiar with serverless software development. Skilled in collaborating with multidisciplinary teams, delivering exceptional products, and continually seeking to learn new technologies. Adept at problem-solving and proactively identifying opportunities for software improvements. Seeks a position to bring a combination of technical expertise and forward-thinking innovation, ensuring robust and efficient solutions to drive digital transformation and business growth.

WORK EXPERIENCE

Full Stack Developer
2ulaundry.com

Feb. 2020 – Present
Charlotte, NC (Remote)

Responsibilities

- Build and maintain large software platforms using Next.js, and Expo.
- Participate in an on-call rotation to support production systems and investigate issues when they occur.
- Write high-quality code that is well-tested, secure, and maintainable.
- Contribute directly to efforts through building features and frameworks, conducting code reviews, and participating in architecture and system design discussions.
- Design and develop solutions able to process large volumes of data.
- Lead and participate in positioning our entire software stack - both application and DevOps-related - for success as we transition from a startup to a large organization.
- Be instrumental in the transition from our monolith into Service Oriented Architecture.

Full Stack Developer
Rextie.com

Sept. 2018 – Feb. 2020
Lima, Peru (On Site)

Responsibilities

- Provide mentorship and guidance to junior developers, helping them to grow their skills and build their knowledge.
- Write clean and reusable unitests, integration and end-to-end test development.
- Improve the quality and usefulness of existing features, by refactoring and decomposition.
- Lead by example in the practice and promotion of excellence in software engineering
- Help with root cause analysis, which may identify issues in the reporting, front end or even requirements.
- Collaborating with various cross functional teams like design, product management and backend architects and development teams to validate prototypes and to create elegant, usable, responsive, and interactive interfaces which meets client requirements.
