Romel is a skilled backend & frontend developer with over 10 years of experience, with a track record of building high-value software solutions. Experienced with tests, and familiar with microservices. He loves collaborating with multidisciplinary teams, delivering exceptional products, and continually seeking to learn new technologies. He seeks a position to bring a combination of technical expertise and forward-thinking innovation, ensuring robust and efficient solutions to drive digital transformation and business success.

**SKILLS**

<b>Back-End</b>	<a href="#">NestJS</a> , Python, Node, Java, Golang
<b>Front-End</b>	<a href="#">NextJS</a> , React, Angular, Typescript, JQuery
<b>Mobile</b>	Expo, React Native, iOS Swift
<b>Search Engines</b>	Algolia, <a href="#">Meilisearch</a>
<b>ORMs</b>	<a href="#">Prisma</a> , TypeORM
<b>Database</b>	PostgreSQL, MySQL, <a href="#">Supabase</a> , Firebase
<b>DevOps</b>	Bash, Docker, Google Cloud
<b>Monorepo</b>	<a href="#">NX.dev</a> , <a href="#">Pantsbuild</a>
<b>APIs</b>	<a href="#">Databricks</a> , Stripe API
<b>SEO</b>	Google Analytics, Google Tag Manager
<b>NoCode</b>	Retool
<b>Design</b>	Figma

## WORK EXPERIENCE

### Backend Developer

[maergo.com](https://maergo.com)

Mar. 2024 – June. 2024

Austing, TX · Remote

#### Responsibilities

- Build a CVS load view in [Retool](#) that accelerates the business data loading time by one week.
- Build a python scraper that collects and normalizes data from various airlines, and then saves it in [Databricks](#).

### Full Stack Developer

[2ulaundry.com](https://2ulaundry.com)

Feb. 2020 – Jan. 2024

Charlotte, NC · Remote

#### Responsibilities

- Build and maintain large software platforms using Next.js, and Expo.
- Implement Algolia as a search engine to perform quick and personalized searches of customers' orders.
- Develop three React Native apps: one for drivers to track tasks and to-dos, another for customers to schedule pickups and drop-offs, and a third for operations to keep all activities in the facilities in sync.
- Participate in an on-call rotation to support production systems and investigate issues when they occur.
- Write high-quality code that is well-tested, secure, and maintainable.
- Contribute directly to efforts through building features and frameworks, conducting code reviews, and participating in architecture and system design discussions.
- Design and develop solutions able to process large volumes of data.
- Lead and participate in positioning our entire software stack - both application and DevOps-related - for success as we transition from a startup to a large organization.
- Be instrumental in the transition from our monolith into Service Oriented Architecture.

### Full Stack Developer

[Rextie.com](https://Rextie.com)

Sept. 2018 – Feb. 2020

Lima, Peru · On Site

#### Responsibilities

- Provide mentorship and guidance to junior developers, helping them grow their skills and knowledge.
- Write clean and reusable unit tests, integration, and end-to-end test development.
- Lead by example in the practice and promotion of excellence in software engineering.

- Help with root cause analysis, which may identify issues in the reporting, front end or even requirements.
- Collaborating with various cross-functional teams like design, product management, backend architects, and development teams to validate prototypes and to create elegant, usable, responsive, and interactive interfaces that meet client requirements.

## Full Stack Developer

MercadoChevere.com

Dec. 2014 – Sept. 2018

Maturin, Venezuela · Remote

### Responsibilities

- Implement Algolia as a search engine to perform quick and personalized searches of customers' publications.
- Design and implement JAVA-based microservices for managing binary tree structured product categories, ensuring scalability and performance.
- Develop APIs for category management, allowing seamless integration with front-end interfaces and third-party services.
- Architect database schemas to efficiently store and query hierarchical product data, leveraging binary tree structures for optimized access.
- Collaborate with front-end developers to ensure APIs meet the dynamic needs of the user interface, enhancing user experience.
- Conduct thorough code reviews to maintain high code quality, focusing on readability, reusability, and maintainability.

## EDUCATION

Professor of Informatics

University UPEL IPM | Aug. 2016

Maturin, Venezuela

## INFORMATION

Languages: Fluent in English and Spanish.

As a dedicated Full Stack Developer with a passion for problem-solving and continuous learning, I am confident in my ability to contribute to your team's success. I look forward to discussing how my skills and experiences align with your needs. Thank you for considering my application.
