<https://calendly.com/romel-maryline/30min>

Romel is a skilled backend & frontend developer with over 10 years of experience, with a track record of building high-value software solutions. Experienced with tests, and familiar with microservices. He loves collaborating with multidisciplinary teams, delivering exceptional products, and continually seeking to learn new technologies. He seeks a position to bring a combination of technical expertise and forward-thinking innovation, ensuring robust and efficient solutions to drive digital transformation and business success.

SKILLS

Back-End	NestJS , Python, Node, Java, Golang
Front-End	NextJS , React, Angular, Typescript, JQuery, AstroJS
Mobile	Expo, React Native, iOS Swift
Search Engines	Algolia, Meilisearch
ORMs	Prisma , TypeORM
Database	PostgreSQL, MySQL, Supabase , Firebase
DevOps	Bash, Docker, Google Cloud
Monorepo	NX.dev , Pantsbuild
APIs	Databricks , Stripe API
SEO	Google Analytics, Google Tag Manager
NoCode	Retool
Design	Figma

WORK EXPERIENCE

Backend Developer
maergo.com

Mar. 2024 – June. 2024
Austing, TX · Remote

Maergo.com was a package delivery service provider. Unfortunately, the company has closed its operations; Ref: [link](#).

Responsibilities

- Build a CVS load view in [Retool](#) that accelerates the business data loading time by one week.
- Build a python scraper that collects and normalizes data from various airlines, and then saves it in [Databricks](#).

Full Stack Developer
2ulaundry.com

Feb. 2020 – Jan. 2024
Charlotte, NC · Remote

2ulaundry.com is a laundry and dry cleaning service that picks up, cleans, and delivers your clothes in as little as 1 business day.

Responsibilities

- Build and maintain large software platforms using Next.js, and Expo.
- Implement Algolia as a search engine to perform quick and personalized searches of customers' orders.
- Develop three React Native apps: one for drivers to track tasks and to-dos, another for customers to schedule pickups and drop-offs, and a third for operations to keep all activities in the facilities in sync.
- Participate in an on-call rotation to support production systems and investigate issues when they occur.
- Write high-quality code that is well-tested, secure, and maintainable.
- Contribute directly to efforts through building features and frameworks, conducting code reviews, and participating in architecture and system design discussions.
- Design and develop solutions able to process large volumes of data.
- Lead and participate in positioning our entire software stack - both application and DevOps-related - for success as we transition from a startup to a large organization.
- Be instrumental in the transition from our monolith into Service Oriented Architecture.

Full Stack Developer
Rextie.com

Sept. 2018 – Feb. 2020
Lima, Peru · On Site

Rextie.com is a currency exchange house.

Responsibilities

- Provide mentorship and guidance to junior developers, helping them grow their skills and knowledge.
- Write clean and reusable unit tests, integration, and end-to-end test development.
- Lead by example in the practice and promotion of excellence in software engineering.
- Help with root cause analysis, which may identify issues in the reporting, front end or even requirements.
- Collaborating with various cross-functional teams like design, product management, backend architects, and development teams to validate prototypes and to create elegant, usable, responsive, and interactive interfaces that meet client requirements.

Full Stack Developer

MercadoChevere.com

Dec. 2014 – Sept. 2018

Maturin, Venezuela · Remote

MercadoChevere.com was an e-commerce site, it is no longer active.

Responsibilities

- Implement Algolia as a search engine to perform quick and personalized searches of customers' publications.
- Design and implement JAVA-based microservices for managing binary tree structured product categories, ensuring scalability and performance.
- Develop APIs for category management, allowing seamless integration with front-end interfaces and third-party services.
- Architect database schemas to efficiently store and query hierarchical product data, leveraging binary tree structures for optimized access.
- Collaborate with front-end developers to ensure APIs meet the dynamic needs of the user interface, enhancing user experience.
- Conduct thorough code reviews to maintain high code quality, focusing on readability, reusability, and maintainability.

EDUCATION

Professor of Informatics

University UPEL IPM | Aug. 2016

Maturin, Venezuela

INFORMATION

Languages: Fluent in English and Spanish.

As a dedicated Full Stack Developer with a passion for problem-solving and continuous learning, I am confident in my ability to contribute to your team's success. I look forward to discussing how my skills and experiences align with your needs. Thank you for considering my application.
